Jev PvE Results

Jev (TypeSafe System One, jev-preview = jev-1.14.0) plays the standard PvE fights in Minecraft 26.3 · 2026-10-23

35 / 205
Jev wins, 60 FPS run (v2)

7 / 50
Jev, top choice, standard 50 fights

0 / 50
Fable 5.1, same 50 fights

What we ran

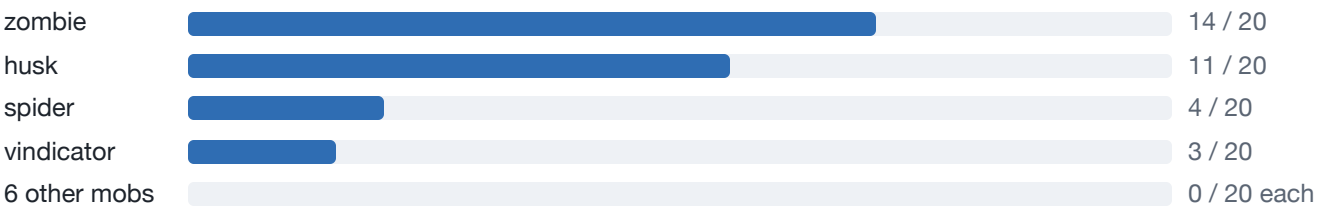

- For each step, the code took a screenshot and asked Jev to pick 1 of 7 actions: forward, back, turn left, turn right, attack, charge (step forward and swing), or shield. Each action came with a written rule that Jev read.
- The code shuffled the order of the actions on every call, because Jev tends to pick the first one listed.
- The code played the action, then recorded the damage dealt and taken before the next screenshot.
- The fights were the same as in the standard benchmark: 10 mobs, 3 sites, iron gear, a 90 s limit, and the same order.
- Each run had 205 fights: 5 zombie test fights, then the standard 50 fights 4 times.

Wins by batch (v2, 60 FPS)

Group	How the action is chosen	Wins	95% range
Test fights (zombie)	random, weighted by Jev's odds	3 / 5	23–88%
Batch 1	random, weighted by Jev's odds	8 / 50	8–29%
Batch 2	random, weighted by Jev's odds	9 / 50	10–31%
Batch 3	random, weighted by Jev's odds	8 / 50	8–29%
Batch 4	Jev's top choice	7 / 50	7–26%
Batches 1–4		**32 / 200**	**12–22%**
Fable 5.1 (earlier benchmark)	Fable's own choice	0 / 50	0–7%

95% range: if Jev played these fights many more times, its real win rate would very likely (95% sure) land in this range. Fewer fights give a wider range.
Playing Jev's top choice did not win more often than picking at random by Jev's odds (7/50 vs 25/150).

Wins by mob (v2, batches 1–4, 20 fights per mob)

- Jev won 0 fights against cave spiders, creepers, pillagers, skeletons, strays, and witches.
- 14 of the 20 creeper fights ended as "target lost": the creeper exploded.

- Jev never damaged a cave spider or a skeleton.
- The median win took 7 s of game time. The fastest win took 4.1 s.

Data

Run	Fights	Wins	Technical failures	Steps
v1 (night; 30 FPS from fight 510)	205	27	2	7,890
v2 (60 FPS, no CPU limits)	**205**	**35**	**0**	**8,081**

- Jev returned 0 errors in both runs. Jev's median reply time was 0.22 s in v2, and the median pace was 1.27 decisions per second.
- Each step stores the screenshot, Jev's odds for each action, the action played, the mob's box on screen, and the damage dealt and taken.
- v2 is the clean run. In v1, fights 506 and 507 failed after the VM was moved to low-power cores.

Takeaways

- Jev with simple action rules wins against mobs that fight up close (zombie, husk), where Fable won nothing.
- Jev's rules do not handle ranged mobs, exploding creepers, witches, or small, fast cave spiders.
- Data is cheap: one 205-fight run costs about $0.60 and takes about 2.3 hours.
